**Note:** 1. All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of abmbient temperature

- 2. Ripple&noise are measured at 20MHz of bandwidth by using at 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor.
- 3. Derating may be needed under low input voltage, Please check the static characteristics for more details
- 4. Tolerance:includes set up tolerance, line regulation and load regulation
- 5. The power supply is considered as a component that will be operated in combination with final emquipment. Sice EMC performance will be affected by the complete installation, the final equipment manufacturers must re-quality EMC. Directive on the complete installation again.
- 6. Length of set up time is measured at first cold start. Turning ON/OFF the power supply may lead to increase of the set up time
- 7. The unit might not be suitable for lighting applications in EU countries. Please check with your local authorities for possible use of the unit
- 8. Suitable for indoor use or outdoor use wihtout direct sunling exposure
