

Декодер LW-DMX-24CH (12-24V, 1440-2880W)

Browse by application area		
		
		
		

Features

DMX512 decoder LW-DMX-24CH can drive LED with PWM signal output

DMX address can be set by DIP switch on the decoder

Applications

- Suitable for the LED module, LED pixel light, LED strip, LED bar, etc

Parameters

Voltage	DC12-24V
Working Current	100mA max
Input Signal	DMX512
Input Port	Standard 3PIN XLR port
Output Signal	PWM
Output Channel	24 channels
Control Capacity	5A Max for each channel
